Work Experience

 Junior Software Developer • [Digia Plc](#)

March 2023 - Present

Digia is a Finnish SaaS company that provides Financial Solutions to clients. My main responsibilities at the company are to develop and maintain the software according to the customers' requirements. I contributed to building new features on both the web and the desktop platform.

Education

Metropolia University of Applied
Sciences

Information Technology

2020 - 2024

Phu Nhuan High School

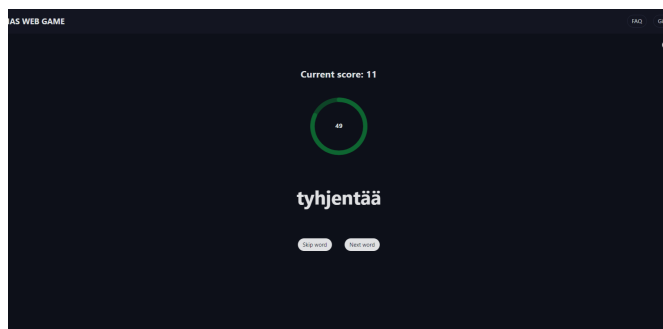

Junior High/Intermediate/Middle School
Education and Teaching

2018 - 2020

Projects

[Alias Web Game](#)

This was my thesis project. A word-guessing web-game modeled after the Finnish Alias game. This is currently being used in teaching courses at Metropolia UAS.

[SkeletonUI](#)

Skeleton is one of the most popular open-source UI library. It currently supports Svelte and React. I am a member of the team currently maintaining Skeleton on GitHub.
