Work Experience

Junior Software Developer • [Digia Plc](#)

March 2023 - Present

Digia is a Finnish consultant business that provides financial solutions to its clients. I work in the DiFs unit of Digia, providing back office software for major banks in Finland and Sweden. My main responsibilities at the company are:

- Maintaining software products
- Implementing new features into products
- Constructing delivery packages to customers
- Fixing bugs from regression testing

Education

Bachelor of Engineering • [Metropolia UAS](#)

August 2020 - November 2024

Metropolia UAS is the biggest university of applied sciences in Finland. I enrolled to the school's Information Technology programme in 2020 and majored in Embedded Systems. In 2024, I graduated from Metropolia with a GPA of 3.2.

Projects

Skeleton Design System • [Skeleton](#)

November 2023 - Present

Skeleton is an open-source design system that leverages TailwindCSS to create modern and easy-to-use web components. Moreover, Skeleton offers a range of well-crafted widgets for Svelte and React projects, providing its users with an array of ready-made UI components. Combining these factors give user an excellent head-start to building their website's layout. I'm part of the core team that is maintaining Skeleton.
